

HEY, YOU! YES, YOU, ANGLER. YOU LOVE NATURE, DON'T YOU?

Did you know that average angler loses 200 g of lead in the water every single year?
(that is 2k-6k TONS a year in EU only)

We don't want to steal your fishing thunder, but here are some facts on lead poisonous effects:

- LEAD CONCENTRATION IN BLOOD EVEN BELOW 0,5 µg/l RESULTS IN DECREASED INTELLIGENCE IN CHILDREN
- KIDS ABSORB UP TO 70 % AND ADULTS ABOUT 20 % OF DIGESTED LEAD
- BRAIN, NERVOUS SYSTEMS, REPRODUCTIVE SYSTEM DAMAGE AND MUCH MORE ARE SCIENTIFICALLY APPROVED

How does lead even end up on your table and in your bed?

Pond mud with lead is being used to fertilize our fields and at last but not at least, adult angler decreased sex drive caused by lead can be also an itchy issue...

Hence, without you even realising it, lead slowly and silently changes your and your loved ones lives.
